

Explore CEimpact's Advanced Training Programs for Pharmacy Technicians

Expand Skills. Expand Opportunity.

Pharmacy technicians are essential to modern pharmacy practice. As services expand, so do opportunities for technicians to step into advanced, specialized roles. CEimpact's advanced training programs empower technicians to build high-demand skills, earn recognized credentials, and become indispensable members of the pharmacy team.

Service Expansion & Clinical Support Training:

Immunization Administration Training (6 hr)

A 6-hour ACPE-accredited course that prepares pharmacy technicians to safely administer immunizations in accordance with CDC guidelines and HHS requirements. The program includes 4 hours of self-paced home study and a 2-hour live virtual workshop with skills demonstration and assessment conducted by a CEimpact trainer. Valid through 4/7/2028

- [With Virtual Assessment](#) – \$249
- [With PTCB Exam Access Code](#) – \$294

Point of Care Testing (4 hr)

Pharmacy technicians are at the front-line for delivering patient care. This training will equip you with the necessary skills to administer point of care tests in the pharmacy. Don't miss the opportunity to assist pharmacists with testing services for your pharmacy's patients. Valid through 10/17/2028

- [Standard](#) – \$49
- [With PTCB Exam Access Code](#) – \$114

Continuous Glucose Monitoring (6.5 hr) – \$99

Take this six-module course that prepares pharmacy technicians for integration and support of CGM services, including patient selection, remote monitoring, workflow implementation, and strategies to improve outcomes for patients with and without diabetes. Valid through 6/1/2027

Pharmacy-Based Travel Medicine (4 hr) – \$49

Dig into this practical course that prepares pharmacy technicians to support travel health services. Training includes vaccines, prescription and OTC recommendations, and workflow strategies for implementing travel medicine in community pharmacy practice. Valid through 6/15/2028

Pharmacy-Based Hearing Aids (3 hr) – \$49

A focused course that prepares pharmacy technicians to educate patients on hearing loss, guide OTC hearing aid selection, and support referrals to improve patient quality of life. Valid through 9/1/2026

Advanced Credentials & Career Advancement:

Technician Product Verification Training (8 hr)

A certificate course that fulfills PTCB education requirements for Product Verification. It includes patient safety, error prevention, dispensing simulation, and results in an ACPE Certificate of Completion from CEImpact.

Valid through 1/22/2028

- [Certificate Program](#) – \$149
- [With PTCB Exam Access Code](#) – \$219

Regulatory Compliance Specialist (15 hr) – \$149

A 15-hour advanced course covering technician legal responsibilities, state and federal regulations, drug and controlled substance safety, and expanded patient care roles. Earn a badge demonstrating expertise in pharmacy compliance and regulation. Valid through 12/15/2028

Regulatory Compliance Training (5 hr)

Focused learning that prepares pharmacy technicians to support federal and state compliance through training in pharmacy law, ethics, safety, and quality assurance practices. Valid through 4/21/2028

- [Standard](#) – \$99
- [With PTCB Exam Access Code](#) – \$159

Supply Chain & Inventory Management (3 hr)

Pharmacy technicians take this course to prepare to manage pharmacy inventory and supply chain responsibilities, including product safety regulations, documentation, and supplier oversight. Valid through 7/1/2028

- [Standard](#) – \$49
- [With PTCB Exam Access Code](#) – \$114

Specialty Practice Opportunities:

Veterinary Medicine: Introductory Bootcamp (6 hr) – \$99

A 6-module course that prepares pharmacy technicians to accurately and safely recognize and dispense veterinary medications in compliance with applicable laws and regulations. Valid through 4/1/2028

Veterinary Medicine: Advanced Specialized Training (6 hr) – \$99

An advanced course covering compounding, cardiology, endocrinology, neurology, and infectious diseases in veterinary pharmacy practice. Introductory Bootcamp completion is recommended prior to enrollment. Valid through 9/1/2027

Foundational Excellence:

Pharmacy Technician Training Program (6 hr) – \$99

A “must have” for career advancement covering dispensing, pharmaceutical calculations, confidentiality, error prevention, and regulatory compliance to prepare technicians for safe, efficient pharmacy practice. Valid through 8/31/2028

Advance Beyond the Counter

Pharmacy technicians are no longer limited to traditional roles. With advanced training, technicians can:

- Support billable clinical services
- Step into compliance and safety leadership roles
- Qualify for advanced verification positions
- Increase job mobility and earning potential
- Become indispensable members of expanding pharmacy teams
