

Immunization Administration Training for Pharmacists - Disclaimer

Due to restrictive policies regarding immunization education and training in **New York and Massachusetts**, this course may not be accepted as a prerequisite to becoming an immunizer if you practice in these states. Please contact your Board of Pharmacy for details before purchasing this course.

This training is approved in **New Mexico**; however, pharmacists must also complete one (1) additional hour of pediatric instruction through NMPHA (<https://nmpharmacy.org/>).

It should be noted that CEimpact's immunization administration training meets all requirements established by the U.S. Department of Health and Human Services as well as the rules governing pharmacy practice in each of these three states. Unfortunately, however, policies have been established by each state's regulatory agency restricting access to available trainings. We encourage you to engage with your regulatory agency and communicate how restricted access to training can negatively affect your community's health. If we can assist you in making a case for acceptance of CEimpact's immunization training, please reach out to us at immunize@ceimpact.com.
